EDUCATION

Belarusian State University

Dr. Hab., Condensed matter

Dissertation: Local atomic order, charge transfer and magnetic state of stabilized nanocomposites ferromagnetic alloy-insulator

Minsk, Belarus

2013

Belarusian State University

Niewodniczanski Institute of Nuclear Physics

PhD, Solid state physics

Dissertation: Local order in Fe-B-N system formed by sequential implantation of boron and nitrogen into iron films

Minsk, Belarus &

Cracow, Poland, 1998

Belarusian State University

MSc

Minsk, Belarus

1994

GRANTS AND AWARDS

Grant of EU COST Action MP0903

2012

Institute of Nuclear Sciences VINCA

CNRS grants

2007-2010

University of Poitiers

Invited researcher fellowship of Poitou-Charentes

2006

University of La Rochelle

Grant DAAD

2005

University of Gottingen

INTAS fellowship

2002

Padova University

Grant of Queen's Jadwiga Foundation

2001

Jagiellonian University

Grant of Mianowski Foundation

1999

Jagiellonian University

RESEARCH EXPERIENCE

NC PHEP BSU Belarusian State University

Head of the Lab "Physics of prospective materials"

2008 – Present

Structural characterization, magnetic properties and charge transfer in nanocomposites and nanostructured materials

– New technological approach for synthesis of metal-insulator nanocomposite films in reactive gases to stabilize granular structure of films.

– Characterization of oxidation sequence of magnetic alloy nanoparticles (MNPs) as a function of insulating matrixes chemical composition and synthesis regimes (XRD, TEM, HRTEM, Mössbauer spectroscopy, EXAFS, XANES).

– Effect of surface oxidation of MNPs on magnetic properties (VSM, SQUID), charge transfer and magnetoresistance; modeling of VRH AC conductivity.

– Magnetometry and characterization of charge transfer in template-assisted 3d-metal nanostructures (nanorods, nanowires).

– Characterization of magnetic properties of single and multi-walled carbon nanotubes (VSM, SQUID, Mössbauer spectroscopy).

NC PHEP BSU Belarusian State University

Senior researcher

2000 – 2007

- Study of the surface corrosion dynamics in multiphase nanostructured FeAl powder alloys prepared by reactive synthesis
- Early-stage oxidation diagnostics in Al and Al_2O_3 -coated Fe powders and dense samples, based on magnetization, magnetoresistivity and local Fe states analysis

RECENT PROJECTS

2013-2015 Leader of National Project No 1.37 “Nanocomposite films with magnetic anisotropy for designing of magnetic memory and sensors”.

2013-2015 Leader of National Project No 2.4.10 “Designing of magnetic multilayered nanostructures on porous materials for designing of spintronic elements and information visualization”.

2010-2013 participant of the EU COST Action MP0903: “Nanoalloys as advanced materials: from structure to properties and applications”.

2011-2013 Leader of National Project No 1.16 “Designing of magnetic field sensors based on complimentary study of electrical conductivity, magnetoresistance and magnetic properties of granular films”.

2011-2013 Leader of National Project No 2.04.12. “Structure and magnetic properties of nanosized iron agglomerations inside carbon nanotubes and porous silicon”.

2011-2013 Leader of bilateral project with Serbia: “Matrix magnetically ordered Pt-Ni(Co), Pd-Ni(Co) nanostructures for nanoelectronic and spintronic devices of new type”.

2010-2012 Leader of bilateral project with Russia: “Nanocomposites with “core-shell” ferromagnetic nanoparticles in dielectric matrixes”.

2010-2012 Leader of bilateral project with Poland: “Spintronic metal-insulator composites with tailored magnetotransport properties”.

2009-2011 Leader of bilateral project with France (CNRS): “Physical principles of early-stage oxidation diagnostics in Al and Al_2O_3 -coated Fe powders and dense samples, based on magnetization, magnetoresistivity and local Fe states analysis”.

2006–2010 Leader of National Project No 3.07: “Synthesis technology and study of composite films for designing of sensors, microcapacitances and microinductances”.

SELECTED INTERNATIONAL CONFERENCE PRESENTATIONS

S.Dubois, **J.Fedotova**, J.Nechaj et al (2008), Mössbauer characterization of as-prepared and oxidized Al-coated and Al_2O_3 -coated iron particles, *oral presentation* at the Int. Conf. “Mössbauer spectroscopy in materials science”, Hlochovce, Czech Republic.

J. Fedotova et al (2008), Hydrogenation of FeCoZr-Al₂O₃ nanocomposites studied by Mössbauer spectroscopy and magnetometry, *oral presentation* at the Proc. Intern. Conf. on Industrial Application of Mossbauer Effect (ISIAME 2008), Budapest, Hungary.

J.Kasiuk, **J.Fedotova** et al (2010), Effect of «core-shell» structure on coupling between spin-dependent magnetoresistance and magnetization in FeCoZr oxide-Al₂O₃ granular nanocomposites, *oral presentation* at the 23rd General Conf. Condensed Matter Division of the European Physical Society, Warsaw, Poland.

J. Fedotova et al (2010), Spin-dependent magnetoresistance and magnetization in oxidized FeCoZr-Al₂O₃ granular nanocomposites with «core-shell» structure, *oral presentation* at the 12th Ann. Conf. YUCOMAT-2010, Herceg Novi, Montenegro.

J. Fedotova (2012), Metal-insulator nanostructured films for magnetoelectronic devices: properties and application, *invited talk* at the 56th Internationales Wissenschaftliches Kolloquium Ilmenau University of Technology, Ilmenau, Germany.

J. Fedotova (2013) Tailored magnetic and electric states in 3d-metal – insulator films: characterization and application, *invited talk* at the XLVIII Zakopane School of Physics “Breaking Frontiers: Submicron Structures in Physics and Biology”, Zakopane.
